Your Partners In Farming

# PHALANX

All-Purpose Cleaner and Degreaser

## Dairy Farm Chemicals

Velocity Chemicals can help optimize your dairy operation with measurable improvements in operational efficiency, overall farm sustainability and milk safety and quality.

We help dairy producers improve cleaning and sanitization, and provide high-quality products needed to produce safe, wholesome milk. Our account representatives work with you to deliver innovative chemical products and programs, backed by our technical experts.

### Paul Krieser

*President and CEO*

Velocity Chemicals Ltd.

Velocity Chemicals is a recognized leader in the formulating and manufacturing of chemical degreasing and cleaning products, providing trusted cleaning solutions to a wide range of industries.

## What is PHALANX?

PHALANX is specially formulated to break down and dissolve oil and grease efficiently to meet the needs of dairy farmers.

### Farming Partners Your Success is Our Success

PHALANX is the latest product in our range of degreasers and cleaners, helping farmers achieve greater hygiene quickly and cost-efficiently, and improve milk quality and profitability.

### PHALANX

All-Purpose Cleaner and Degreaser

A water-based general purpose cleaner and degreaser, PHALANX is CFIA approved making it ideal for the cleaning of dairy and food processing areas, milking parlour and barn walls and floors, farm equipment, sidewalks and walkways. Its innovative formula provides accelerated action in penetrating and dissolving grease and oil, ensuring the highest quality clean.

## How Does PHALANX Work?

Mixed with water, PHALANX can quickly remove common soils from milking parlour equipment, walls and floors, including solidified fats, deposits of milk lactose, denatured proteins, and hardened minerals.
