

1

Micro bio-reactors embed in sludge layer and produce millions of additional colonies that keep the sludge liquefied.

2

Delivers more than 100 times higher microbial counts than traditionally found in other microbial products.

3

Greatly reduces cost associated with pumping pits, lagoons or tanks.

ManureMagic™ Advantages Over Liquid Treatments

Field trials were held at a pig farm in Iowa, USA, in August 2012. The results revealed ManureMagic™ superior to alternative liquid treatments in 5 key ways.

4

Manure odours are slashed by 70%-75%.

5

Eliminates methane build-up, thus increasing farm safety.

Your Partners In Farming

ManureMagic™

Environmentally Friendly Control
of Odour, Flies, Crust & Sludge

Take the Stink Out of **Manure**

Animal waste is a natural by-product of confined or intensive swine, poultry, and dairy farming operations, and feedlot operations. While this waste is natural, it can pose health and environmental risks if not managed properly.

The chemical makeup of animal waste contains nitrogen, phosphorus, and potassium. In addition, it can contain antibiotics and thus pose run-off risks to water supplies.

Paul Krieser

President and CEO

Velocity Chemicals Ltd.

What is **Manure Magic™**?

ManureMagic™ is the new product name for DryLet AWS, a patented foam and sludge-reducing product that is dry to the touch.

Farming Partners **Your Success is Our Success**

At Velocity Chemicals, we view all of our customers as partners. ManureMagic™ is the latest product we offer that is designed to help farmers prosper through greater efficiency and profitability.

Manure Magic

Environmentally Friendly Control of
Odour, Flies, Crust and Sludge

Patented ManureMagic™ is highly concentrated and utilizes millions of micro bio-reactors to deliver hundreds of billions of live microorganisms that consume solids associated with animal production. ManureMagic™ will significantly reduce solids, crusting, gas build-up and odour. ManureMagic™ will deliver all these benefits without any adverse impact to the environment.

How Does **Manure Magic Work?**

ManureMagic™ delivers live microorganisms that consume solids associated with animal production. Through its unique patented micro bio-reactor, these organisms directly neutralize the key health and environmental problems animal waste can cause.

Now Available **Order ManureMagic™ from Velocity Chemicals**

ManureMagic™ is available directly from Velocity Chemicals to poultry and livestock farmers across British Columbia only. To order, call one of our specialists today at 604 881 4700.
